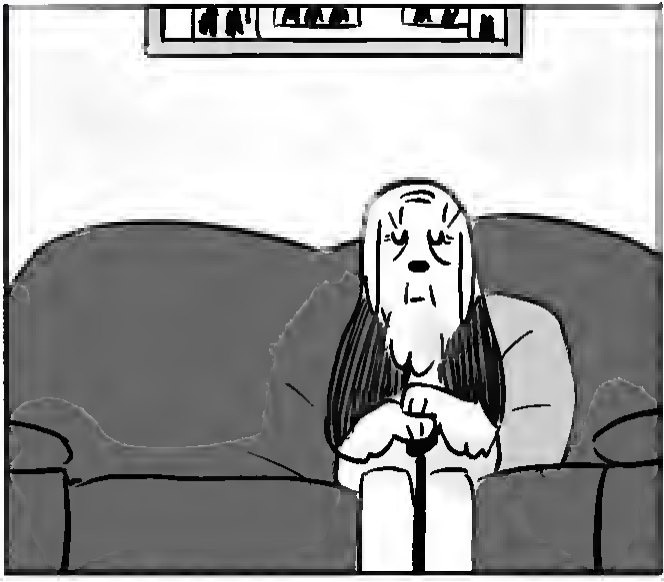
My family used to have dinner at their place every Sunday. My grandma always cooks for us and tell us stories about the past.



She forgot grandpa who has already gone to heaven,

she forgot the stories in her past,

and she forgot how she raised her 5 children.

She forgot most of her life.

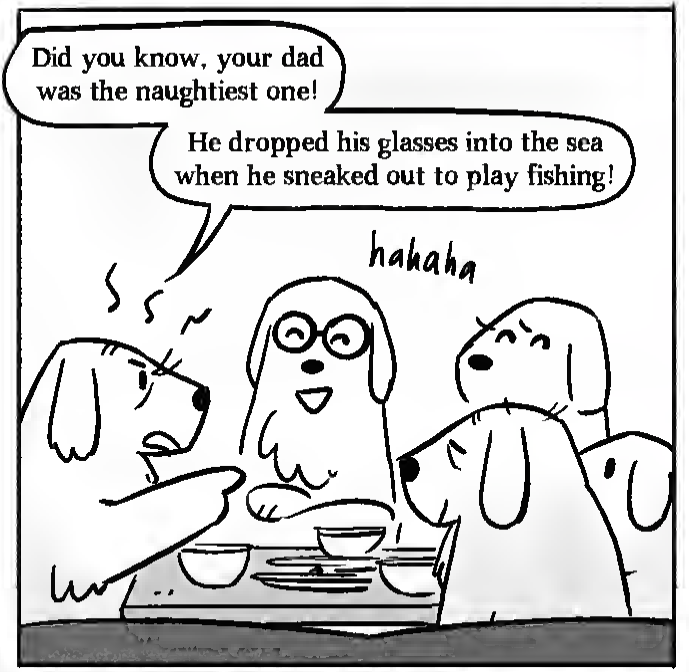
She can't cook now and she is not grumpy anymore.

Did you know, life was really difficult back then...
...we had barely enough to eat!
You should feel lucky to live in today's world!

Although she only went to primary school, she was smart, hardworking and knew a lot of things in life.

The Merlion is Singapore's symbol and landmark!

LINE Webtoon



Did you know, your dad was the naughtiest one!
He dropped his glasses into the sea when he sneaked out to play fishing!
hahaha

How is she doing today?
She slept well last night and is in a good mood.
Thank you for taking care of her.

UNIVERSITY

My grandma is really old now

and we visit her once a month.

Animals Around The World #8

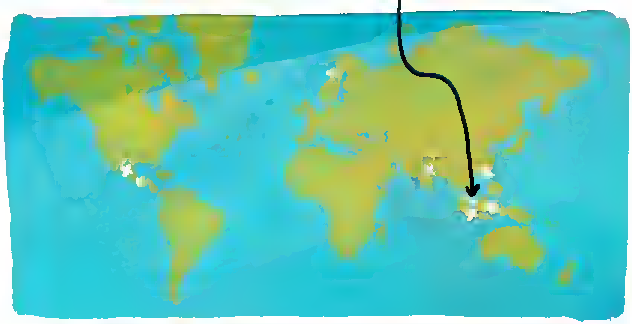
I'm from Singapore and the Merlion or Leo would be the representative!

Readers from Singapore!

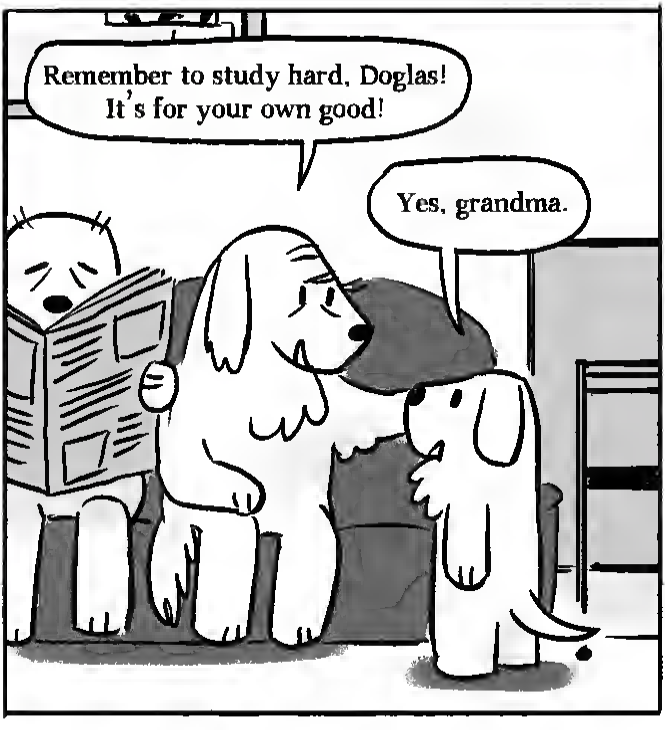


My grandma was a very capable dog.

Many people say it's really sad to lose your memories.

I don't know how it feels,

but grandma looks happy now.

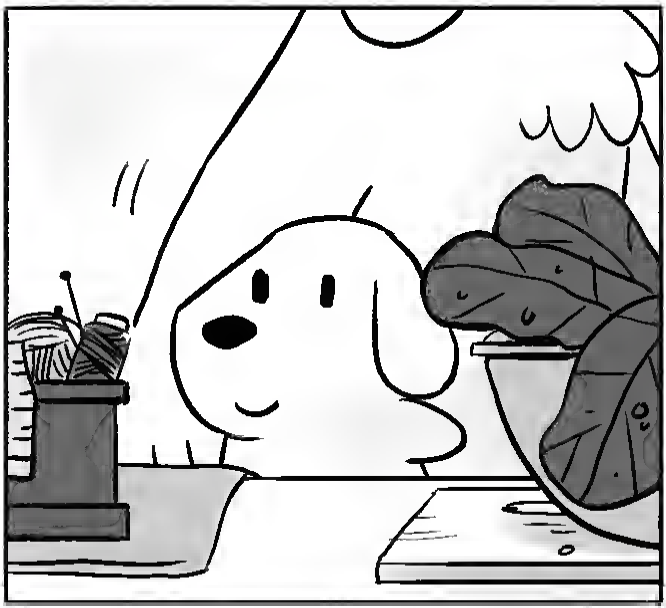


Every time we meet,

she told me to study hard and be a good dog.

But of all the things grandma said,

her favorite line was "It's for your own good."



As my grandpa worked outside, she raised their 5 naughty children. That's why she was always grumpy.

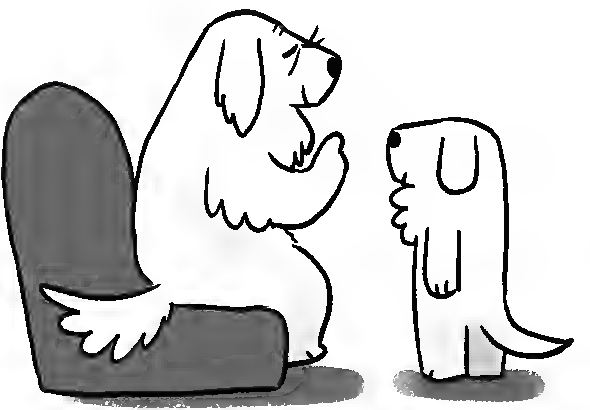
It's For Your Own Good

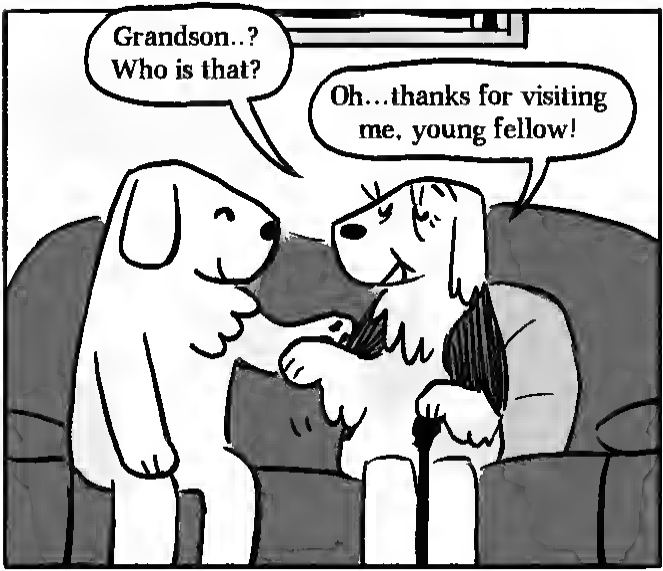


"It's for your own good,"

that's what my grandmother used to tell me.

But still, my grandma never forgets to tell me...

It's me, Doglas!
Uh...who?
Your grandson!

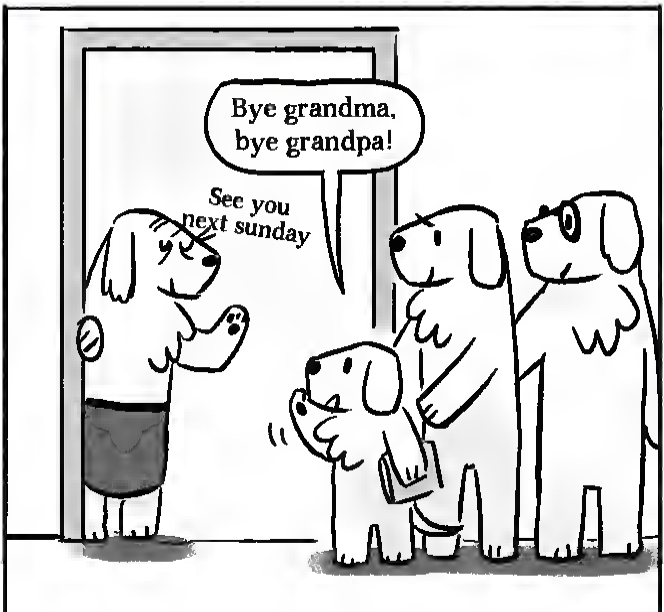


Grandson..?
Who is that?
Oh...thanks for visiting me, young fellow!

I hope grandma will remember me

next time I visit her.

Sometimes, she doesn't even recognize me.



Though I'm lazy sometimes, I remembered her words and studied all the way to university.

Over the years, she developed Alzheimer's Disease which caused her to slowly lose her memories.
